Trijicon's New AccuDial™ Sight Mount Allows Bowhunters and Target Archers To Eliminate the Guesswork Forever!

Wixom, MI – Range your target, dial it in, make the shot...It's that simple! New for 2011, Trijicon's **AccuDial™** Bow Mount enables archers to eliminate the "Hold Over" factor forever! With exact one-yard range adjustment from 20 to 80 yards, the AccuDial mount delivers the amazing precision of a "60 Pin sight"!

There are numerous adjustable bow sight mounts available to archers today. None, however, compare to Trijicon's state-of-the art AccuDial mount. Having designed advanced aiming systems for more than two decades, Trijicon knows that a precision sight demands a precision mount. That's why Trijicon developed the AccuDial featuring **BowSync™** technology. With an infinitely variable transmission, it enables **exact range adjustment** and **synchronization** for any bow-arrow combination. Its laser etched dial makes field adjustments fast and easy—without having to rely on a fragile strip of tape!

When used in conjunction with Trijicon's new **AccuPin™** aperture, or your favorite existing sight, the AccuDial mount allows archers to build their own custom sighting system. The AccuDial also provides bowhunters and target archers with true modular performance by offering matching quiver bracket, a custom Picatinny-style rail adapter for adding a variety of sight apertures, and a spot-shooter extension arm for competition shooting.

Built using only the finest materials, finishes and components, the AccuDial was engineered for real world durability. In an independent study, the AccuDial was subjected to 10 years of simulated daily field use and came out in perfect working order. If that doesn't prove how tough it is, just consider this: The Trijicon AccuDial is backed by a limited lifetime warranty.

The **Trijicon AccuDial™** includes the following performance features and benefits:

- **Laser-Etched AccuDial Yardage Adjustment** – tapeless design with 0 to 80 yard adjustment in precise one-yard increments
- **BowSync Technology**- adjustable transmission to accommodate bow speeds from 250 to 340 fps. *Mount can be transferred and reset for use on multiple bows*
- **Designed for use with Trijicon's AccuPin™ sight or other rail-grabber type sights**
- **Custom Rail Adapter, Quiver Bracket and Spot-Shooter Extension Available**

- **6061-T6 Aluminum Construction**
- **Limited Lifetime Warranty**
- **Made in the USA**

For more information on Trijicon's new AccuDial, and the complete array of **Brilliant Aiming Solutions™** for the hunting, shooting, military and law enforcement markets, contact Trijicon®, Inc. at (248) 960-7700 or visit www.trijicon.com.
